

## **SERENITY CERAMIC SINKS**

Clean the sink using water and a mild detergent with a sponge, rinse and dry off. Do not use harsh chemicals inside the sink; if you would not put it on your hands don't put it in the sink. (Avoid bleach, acids, thinners, etc.) Be advised that some foods contain acids, such as lemons. If these foods contact the sink, rinse off and dry it clean ASAP. Never lay rusted objects or objects prone to rusting inside the sink; although the sink itself is incapable of rusting it will stain if a rusted foreign object is laid in it. Do not put tea bags or coffee inside the sink. If you do, rinse and dry immediately. Sodas can stain the sink if not rinsed out immediately. These sinks do not resist abuse very well. Handle pots and pans with care.
